BSN medical Limited has just released a new application for iPhone (which can also be used on the iPad and iPod Touch) that aims to help make wound assessment easier.

Available FREE via the Apple® App Store the Cutimed Wound Assessment App offers clinicians help and advice when assessing different kinds of wounds. It also simplifies dressing choices by suggesting the most effective products to use for different wound types.

In a sector estimated to cost the NHS over £2bn in the UK alone [1] simplifying dressing choice, preventing inappropriate product use and reducing wastage is a key objective for many budget holders.

The new Wound Assessment App for iPhone, iPod Touch and iPad – Helping to Make Wound Assessment Easier

BSN medical Limited has just released a new application for iPhone (which can also be used on the iPad and iPod Touch) that aims to help make wound assessment easier.

Available FREE via the Apple® App Store the Cutimed Wound Assessment App offers clinicians help and advice when assessing different kinds of wounds. It also simplifies dressing choices by suggesting the most effective products to use for different wound types.

In a sector estimated to cost the NHS over £2bn in the UK alone [1] simplifying dressing choice, preventing inappropriate product use and reducing wastage is a key objective for many budget holders.

Cutimed Wound Assessment App

The Cutimed Wound Assessment App is built around a collection of three sets of bold and easy to use icons as the fundamental cornerstones of wound assessment:

1) Tissue type

2) Wound depth and

3) Exudate level.

It has been designed using standard Apple® functionality so that navigating around the app should be intuitive to users. Handy tips and ideas are included to help clinicans securely dress patients with wounds in awkward areas (elbows, heels, finger tips etc).

Within hours of the App going live Apple® reported 218 downloads by healthcare professionals across the world.

Customer Review: *Excellent app. Very useful for wound identification and the iconic wound care guide is great.*
