Are you looking for A&P for management of venous disease? Look no further. medi UK have designed a certified e-learning module.

In the new eLearning module (60 minutes) you will learn about the following:

- Anatomy & Function: Pulmonary and systematic circulation, the venous and lymphatic system
- Physiology & Pathophysiology: Venous insufficiency, risk factors, causes, symptoms
- Indications: Stages of venous diseases, CEAP classification, chronic venous insufficiency (CVI), venous leg ulcers
- Assessment & ABPI: Importance of a holistic assessment, ABPI measurement, MESI diagnostic tool
- Therapy: Treatment of arterial and venous ulcers, wound cleansing with

UCS Debridement, graduated compression, adjustable compression devices

- Prevention of Recurrence: Rationale for the use of compression hosiery, resting and working pressure, compression classes, compression products, patient education

The process for registration and accessing the module is as follows:

1. Click on the register link below, or via our website.
2. As soon as your registration is accepted, a User Profile is created and you will receive a confirmation email (if not received, please check your junk mail).
3. The venous disease module will be assigned to you by 6 pm the same evening.
4. Once activated, your module will appear in the portal and you can log in at a time that suits you.
