Sorbion sana now on Drug Tariff!

sorbion sana is Sorbion's new atraumatic , hypoallergenic absorbent dressing, contained within our innovative 3-Dimensional non adherent envelope. **sorbion sana** is particularly safe and comfortable for moderate to low exuding wounds or wounds with variable amounts of exudate. Because it is non-adherent the dressing can be left on the wound for up to 7 days, significantly cutting down on dressing changes and the cost of nursing time. **sorbion sana** is hypo-allergenic and is recommended for use on sensitive skin. The product has been demonstrated to be extremely cost effective. In a recent trial the results of which were presented at Wounds UK, Harrogate, November 2008:

- All patients expressed a preference for sorbion sana rather than their previous dressings
- The number of nurse visits was reduced in all cases
- The cost of dressings was reduced in all cases

sorbion sana now available on Drug Tariff. For further information or samples contact H&R Healthcare Ltd on 01482 638491 or email sorbion@hrhealthcare.co.uk
